

WOULD YOU LIKE TO RUN YOUR OWN CLEANING BUSINESS?

A lot of people dream about being in control and making good money by running their own business. It is a natural ambition.

However, normally they do nothing because they are too worried about some of the problems.

Such as:

- How do I get customers?
- How do I do all the paperwork?
- What about the money?
- What if something goes wrong?

Well there is nothing to worry about now because

Will do everything for you

For over the last 40 years we have helped thousands of people to start their own successful cleaning businesses.

We make it easy. Let me tell you how.

Step 1 : Gaining Customers

- We have teams of telesales and experienced surveyors who will find well-priced contracts in your area.
- Each job will come with a written specification detailing what work is involved and how often it needs to be done
- Before you commit to it, our Area Manager will take you to the job, show you around the premises and introduce you to the client. So you will know exactly what is involved.
- Once you have a contract we will then help you to build a successful business by finding more contracts if you want to grow. The sky is the limit. However, if you just want 1 job that is ok too.

Step 2 : We Will Be Your Office

- We take care of all the paperwork including invoicing your clients for you.
- We keep records of who has paid and who hasn't and give reminders when necessary.
- We pay you on the same day each month even if your clients have not paid us, which helps your cash flow.
- We contact your clients regularly to ensure everything is running well and help you resolve any problems that may arise.
- Our offices are always staffed during office hours to deal with any queries you or your clients may have.

Step 3 : How does it work ?

- Most people start with a small evening contract and go from there.
- Some of our contractors are happy running just one or two contracts and doing the cleaning themselves or with their partner. They just enjoy the extra income.
- Others are running substantial businesses and employing staff. Most of whom started in a small way and gradually got more and more contracts
- You choose how big you want your business to grow.

Step 4 : What about the money

- This really is a cheap way to start a business but obviously some financial outlay is required.
- A deposit is needed for each contract you buy but we offer unsecured loans to help you buy the contracts you want.
- The loan can be paid off by monthly instalments over a maximum of two years with the instalments taken from your earnings.
- We take a management fee to cover all the office work but the rest of the money is yours.
- You get the full amount the client is billed each month except we deduct the management fee and the instalment, if you have a loan.
- Then if you decide you want to stop, you can sell your contracts to anyone you choose but, if you wish, Procure will normally buy back the contract and sell it to another contractor for you.
